

The Center for Biocide Chemistries: Advocates for the Global Industry

Who Is the Center for Biocide Chemistries?

- **WE ARE THE LEADING TRADE ORGANIZATION** that represents active ingredient producers and/or end-use manufacturers of biocidal products.
- **WE ASSIST MEMBERS IN MANAGING INDUSTRY AND REGULATORY CHALLENGES** through regular dialogue and information sharing with U.S. and international regulators.
- **WE DIRECTLY COLLABORATE WITH REGULATORY AGENCIES** to replace overly conservative exposure estimates and intervene on issues with far reaching implications for the industry.
- **WE PROVIDE AN OPEN FORUM TO ADDRESS SCIENTIFIC RESEARCH AND REGULATORY ISSUES** by strengthening relationships and engaging with U.S. and international regulatory authorities.

Our Members

The Center for Biocide Chemistries is comprised of more than **40 companies that manufacture and/or formulate active biocide ingredients and biocidal products**. We share a common commitment to drive innovation and establish scientifically sound approaches to assess the potential risks of biocide use before they are brought to market.

Why Join?

Biocides are highly regulated products globally. The Center for Biocide Chemistries addresses a broad range of dynamic issues and provides unique opportunities for companies to **engage in critical dialogue** with one another and a variety of regulators to **help shape the industry**. Working together, the Center helps members navigate the often challenging business, regulatory, and political landscape surrounding biocide registrations. Our success is driven by our in-house expertise in federal, state, and regulatory affairs as well as our core science and research team focused on providing sound, science-based decision making. Our first-in-class political mobilization, communications, and legal services support and complement these advocacy efforts. Our approach includes:

- Information Sharing & Business Networking
- Advocacy & Direct Collaboration with U.S. EPA and the states
- International Engagement & Issue Support
- Product & Market Sector Support
- Regulatory Coordination to Increase Efficiencies
